

At Home Parent Info Guide- Virtual Schooling for Emergency Closure Instructional Technology- Delivering Instruction- Middle Schools

What to Expect:

If school is closed, and virtual schooling is activated, this document outlines what to expect.

Every day, each teacher that your child sees within their schedule, will send an email to your email and your child's school provided Outlook email. That email will have instructional content or an activity of no more than 20-30 minutes for that day. That email will contain a learning target, activities for the daily lesson, links or attachments for content with directions on how to access, and student expectations for completing the work. Questions about this content should be emailed back to the teacher who will be available during normal class hours to handle questions, concerns, and provide assistance.

Access to Resources:

Students should be working on their district issued device to access their Outlook district email, digital textbooks, and other related resources. The students use these resources daily at school, but in case there are questions, here are the different access points.

To access school email, students can visit the website: office.com. Alternatively, they can visit the district webpage, click students, and click on "Office 365 Login". Students sign into this site with their Office 365 credentials (district email and their student ID number)

Digital Textbooks can be accessed through the website: <https://launchpad.classlink.com/wtps> for Algebra, English, Social Studies, French, German, Digital Literacy, Financial Literacy, and Health. Students sign into this site with their Office 365 credentials (district email and their student ID number)

Spanish, Math, Pre-Algebra, Advanced Math, Science, and Advanced Science will access their digital textbooks through the Unified Classroom. <https://classroom.powerschool.com/> Students sign into this site with their Office 365 credentials (district email and their student ID number) After arriving at that site, they can go to "Quick Links", "Portal Login", "My Calendars" and, "Easy Bridge Access" to see their courses.

Unified Classroom hosts Class Pages, which may contain resources and digital assignments. You can access these through the Unified Classroom. <https://classroom.powerschool.com/> Students sign into this site with their Office 365 credentials (district email and their student ID number)

Some classes may utilize Schoology for resources and digital assignments. You can access this through the link <https://wtps.schoology.com>. Students sign into this site with their Office 365 credentials (district email and their student ID number)

Other materials will be available through individual teachers, they can provide login and access information.

Again, teachers will be available by email to answer questions and provide assistance as needed. The teacher will always be your first level of contact. They can direct questions to technology support as needed.
