

Reminders: We have a full Nearpod Subscription which includes unlimited usage of the Nearpod Lesson Library

- All of these lessons are created by educators who are paid to create lessons for the program. All of these lessons are fully editable so you can make them your own.
- Nearpods produce great data that you can bring to a post-observation for any learning target!
- Nearpods make excellent sub plans! Not planning on being out? Find one in the library and set it to Self-Paced so students can read, watch, and be assessed on the topic of your choosing!

Great ways to diversify and differentiate your Nearpods from the others!

Have you tried “Time to Climb”? Gamify your Quiz Questions so that students can compete towards high scores!

Nearpod now has “Assistive Reader”

- Only visible on the student side, text-based slides and activities now feature this button which activates the assistive reader full functionality

Don't forget that Flocabulary embeds now directly into your Nearpods to add more flexibility and control to your Flocab video exercises!

Want me to help show your students how to use tech tools? I can come to your classes to help!

Find digital copies of this and more resources at wtps.org/techms
