

Human Biology Summer Assignment Course Work

The Science Department is formulating a summer course preparation assignment for students entering Human Biology this Academic Fall year. Below are instructions for students to work on the assignment over the summer and submit the required materials during at the beginning of the first marking period. Shortly after the first two days of school, the summer assignment due date will be announced. This work is to be performed over the summer break to help prepare Human Biology students for lessons to be given and class discussions.

This summer assignment **is required and will be issued a grade** for completion and submittal at the announced due date when school begins in September.

Assignment:

Using the internet as your source, research a current Human Anatomy article that find interesting to read and summarize for class.

1. Download / Print the Full Article of your choose / Submit in class
2. Write or type {preferred} in your own words at least 3-4 key points / facts about the article that can be discussed in class
3. A grade for your work will be discussed during the first few days of school

Below are three {3} websites that you may wish to browse for your research article.

1. biology.new.net { news & current events - articles }
2. sciencedaily.com { full text Bio news articles / updated daily }
3. esciencenews.com { popular science articles about Bio / nature }
