

## Suggestions for Grading and Assessment for the End of the Year...as of 5/4/20

Hi Everyone, I thought I'd give you a one-stop shop for the ideas we have to assess students while at the same time making it manageable for us as teachers to continue to navigate this. Each consists of links that are on our staff webpage as well. All the links provided here are accessible on the BHMS Webpage. In order to view all the links here, you have to log in to SchoolWires. If you'd like to review all the information on the Webpage, follow these steps

- Go to the BHMS Website
  - Click on Staff
    - Click on Staff Remote Learning Links

### I. Suggestions for Lesson Designs

A few weeks back, Greg and I proposed some suggested models for lesson delivery. Each model discusses how to streamline the content while providing a recovery or "catch-up" day that is embedded in your instruction. The recovery or "catch up" day is not a free day, but an actual planned day the students can use to recover learning, possibly reassess, or get the supportive grades in to have the opportunity to reassess.

Please go to this link: [Lesson Designs](#) for support.

This provides an "A" Model and "B" Model. None of these are mandatory, just a thought to help.

### II. Suggestions for Grading and Assessment

In the last video message I sent, I discussed some ideas and suggestions for helping students turn work in and how to properly allow for a reassessment without teachers being at the students' whim or without having students just do grade inflation. Below is that information

Please go to this link: [Retakes, Reassessment, and Grading in MP4](#)

I also contacted a teacher who seems to have a pretty good handled on navigating fluid deadlines and retakes while not making grading burdensome and incessant.

Please see his model here: [Suggested Grading and Assessment Procedures \(Teacher Suggestion\)](#)

Hope this Helps...Thanks Everyone,

Mike
