Interdisciplinary Connections

Instruction in the arts helps students with the development of motor skills, language skills, social skills, decision-making, risk-taking, and inventiveness. Working in the arts helps learners to develop creative problem-solving skills and teaching through the arts can present difficult concepts visually and creatively, making them easier to understand. Arts experiences boost critical thinking, teaching students to take the time to be more careful and thorough in how they observe the world as instruction in the arts connects students with their own culture as well as with the wider world. Integrating art with other disciplines provides challenges for learners at all levels and can reach students who might not otherwise be engaged in other subject areas. Instruction in the arts provides students with the skills to be life-long learners.

Integration of 21st Century Skills

The Arts as Communication

Artistically literate citizens use a variety of artistic media, symbols, and metaphors to independently create and perform work that expresses and communicates their own ideas and can respond by analyzing and interpreting the artistic communications of others.

The Arts as Creative Personal Realization

Artistically literate citizens find at least one arts discipline in which they develop sufficient competence to continue active involvement in creating, performing/presenting/producing, responding and connecting to as an adult.

The Arts as Culture, History, and Connectors

Artistically literate citizens know and understand artwork from varied historical periods and cultures, and actively seek and appreciate diverse forms and genres of artwork of enduring quality/significance. They also seek to understand relationships among the arts, and cultivate habits of searching for and identifying patterns, relationships between the arts and other knowledge.

The Arts as a Means to Well-Being

Artistically literate citizens find joy, inspiration, peace, intellectual stimulation, meaning, and other life-enhancing qualities through participation in the arts.

Interdisciplinary Connections

Instruction in the arts helps students with the development of motor skills, language skills, social skills, decision-making, risk-taking, and inventiveness. Working in the arts helps learners to develop creative problem-solving skills and teaching through the arts can present difficult concepts visually and creatively, making them easier to understand. Arts experiences boost critical thinking, teaching students to take the time to be more careful and thorough in how they observe the world as instruction in the arts connects students with their own culture as well as with the wider world. Integrating art with other disciplines provides challenges for learners at all levels and can reach students who might not otherwise be engaged in other subject areas. Instruction in the arts provides students with the skills to be life-long learners.
